PROFILE

I'm a GenAI Developer with 2.5 years at Hexaware Technologies, shipping enterprise AI systems for a healthcare and insurance client. I work on LLM-driven document intelligence, AI-assisted migration automation, and agentic workflows adopted by delivery teams. I own problems end to end: interviewing stakeholders, deciding where AI genuinely helps, evaluating LLM output, and designing human-in-the-loop boundaries.

EXPERIENCE

GenAI Developer - Hexaware Technologies

May 2024 - Present | Healthcare & Insurance Client

Internship - Hindalco Industries

Internship

SELECTED PROJECTS

AI-Powered Collaboration Intelligence Platform

Automated company-research workflow that finds relevant companies by country or drug and produces source-backed results from the top five web sources.

- Iterative LLM validation loop that verifies extracted details against cited sources.
- Cosine-similarity matching (pgvector) against client-defined selection criteria.
- Human review for outputs scoring below 70%.
- Research turnaround reduced from approx. 1 week to approx. 1 day, approx. 70% accuracy in source-based testing.

FS/TS Generation Framework for Legacy SAP Code (Cursor)

Documentation agent that generates template-compliant functional and technical specs from undocumented legacy SAP code, grounded only in code evidence.

- Chose Cursor over custom infrastructure to reduce maintenance.
- approx. 80% accuracy in manual evaluations, approved by BAs and developers.
- CLI published to the company EDP Agent Hub through a CI/CD pipeline.

Highspot to SharePoint Migration

Migration of 10K+ assets (PDFs, decks, Word, video, images) with metadata and hierarchy preserved.

- approx. 85% of workload migrates fully automatically via deterministic API path.
- AI-assisted page mapping using a component knowledge base (RAG) onto SharePoint Modern Page layouts.
- Strict page JSON validated with Pydantic before publishing; 60-70% accuracy with human review for gaps.
- Rebuilt TreeView keyword columns via SharePoint REST API so search stays intact.

Contract Intelligence Platform

Containerized platform extracting entities and metadata from digital and scanned contracts and uploading structured results to SharePoint.

- Processes 100+ contracts annually.
- approx. 80% reduction in manual review effort.
- Multiprocessing cut batch time by approx. 30%.
- Semantic chunking and contextual retrieval pipeline.

Snowflake GenAI Data Dictionary (POC)

Generates business descriptions for enterprise data assets using Azure OpenAI with RAG.

SKILLS

LLMs & Agents: Azure OpenAI, GPT Vision, LangGraph, LangChain, Agentic workflows, Tool calling, Prompt & context engineering, Spec-driven development

RAG & Document AI: Embeddings, Semantic chunking, Contextual retrieval, FAISS, OCR, Entity extraction

Evaluation & Reliability: DeepEval, LLM validation loops, Pydantic, Guardrails, Human-in-the-loop

Backend & Automation: Python, FastAPI, Multiprocessing, REST APIs, SQLite, Playwright, React, TypeScript, Microservices, Java

Integrations & DevOps: Microsoft Graph API, SharePoint REST API, Highspot API, Tavily, Snowflake, Azure, GitLab CI/CD, Kafka, Docker

RECOGNITION & CERTIFICATIONS

Pinnacle of the Quarter and Certificate of Appreciation, Hexaware Technologies (GenAI initiatives)

Claude Certified Developer - Foundations (Anthropic)

Claude Certified Associate - Foundations (Anthropic)

EDUCATION

B.Tech, Computer Science Engineering

Silicon Institute of Technology, Odisha (Orissa) | 2019 - 2023 | CGPA 8.8
